SUMMARY

Software engineer with 1.5+ years shipping production systems at an AI startup: queue pipelines, LLM evals, billing ledgers and Kubernetes infrastructure on AWS and GCP, end to end in TypeScript, Node.js, Next.js, PostgreSQL, ClickHouse and Terraform.

EXPERIENCE

Software Engineer **Feb 2025 - Present**

MagicAPI (Noveum.ai, API.market) *Remote, San Francisco, CA, USA*

- Moved LLM trace ingestion to an **async BullMQ/Redis queue** on Kubernetes (up to **10K-trace batches**), scaled workers to **10+ deployments**, and fixed an **8.5-hour eval stall** caused by autoscaling.
- Built the **LLM evaluation pipeline end-to-end**, turning AI-agent traces into datasets and eval jobs behind **15+ REST endpoints**.
- Led cloud migrations from **OVHCloud to AWS EKS**, then to **GCP (GKE)** with **6 OpenTofu (Terraform) modules** and Helm charts.
- Moved **20+ dashboard endpoints** from live ClickHouse to PostgreSQL snapshots, cutting peak memory from **4.01 to 1.75 GiB**.
- Rebuilt billing as a **PostgreSQL credit ledger** that prevents overspending and double-charging; added **AWS Marketplace billing**.
- Launched the **public TypeScript API** behind the tracing SDK and an **MCP server** exposing **220+ API routes** as tools.
- Led the initial build of **Orbit**, an open-source realtime issue tracker (**60+ GitHub stars**) that replaced Linear in-house.
- Built API.market's prepaid wallet with Stripe (**$50K+ in transactions**, 1.1K+ users) and a voucher system that distributed **$6.3K+**.

Software Engineer **Feb 2025 - Mar 2025**

CrowdVolt (YC W24) *Remote, NYC*

- Set up shared **ESLint and Prettier** configs across a Turborepo monorepo (web, mobile, 7 packages).
- Improved site performance with **lazy loading and code splitting**, and fixed critical user-facing bugs.

Full Stack Engineer Intern **Apr 2024 - Sep 2024**

Datawavelabs *Remote, India*

- Built the FastAPI backend (**35+ REST endpoints**) of a dashboard for managing AWS, Azure and GCP resources, with OAuth and RBAC.
- Automated **AWS EKS cluster create and teardown** with Terraform runners in Docker, streaming live status to the UI over SSE.

PROJECTS

Devolympus Hackathon Platform | *Next.js, PostgreSQL, Prisma, Cloudinary, OAuth 2.0* **Apr 2025**

- Built a **hackathon management system** handling **350+ registrations** and **80+ teams**, cutting admin work by **80%**.
- Added Google OAuth, team registration, payments, document uploads and a role-based **admin dashboard**.

Deployit | *Next.js, Docker, Redis, S3, Express* **Oct 2024**

- Built a **deployment platform** that builds repos in isolated **Docker containers** from a **Redis queue** and serves them from S3.
- Routed traffic to each deployment by custom slug through an **Express reverse proxy**.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL, HTML, CSS, Bash, HCL, YAML | **CS Fundamentals**: DSA, Distributed Systems
Frontend: Next.js, React, Redux, Tailwind CSS, Shadcn/ui | **Backend**: Node.js, Express.js, Bun, Hono, FastAPI, BullMQ
APIs and Data: REST APIs, GraphQL, WebSockets, SSE, PostgreSQL, ClickHouse, MongoDB, Redis, Elasticsearch, Prisma, Stripe
Cloud: AWS (EKS, EC2, S3, ECR, CodeBuild, WAF, SQS, Bedrock), GCP (GKE, Cloud SQL), Azure | **AI**: LLM evaluation, MCP
DevOps and Tools: Kubernetes, Docker, Helm, Terraform, OpenTofu, GitHub Actions, CI/CD, Git, JWT, OAuth 2.0

EDUCATION

B.Tech in Computer Science, Dronacharya College of Engineering, Gurugram, Haryana, India **2022 - 2026**

LEADERSHIP & ACHIEVEMENTS

- **OpenAI Codex Hackathon**: Secured 7th position for Warden, a trust layer for packages and agent diffs before they run.
- **KRMU Hackathon**: Won 1st place in the AI track with WanderAI.
- **Chairperson, Deviators Coding Club (2024 - 2025)**: Founded the club and organized DevOlympus, a 350+ participant hackathon.
- **ICPC Amritapuri 2023 Regionalist**: Qualified for the regional round of the global programming competition.
- **Gurugram University Ideathon Winner**: Secured first place for AI-driven travel solutions, awarded by the Chief Minister of Haryana.
